Beverage Fountain Operation

Parkland Party and Equipment beverage fountains are designed to circulate clear beverages. Any quantity of pulp, seeds, fruits, rinds, and ice cream, can create foam within the fountain, which will restrict the flow of the beverage. This is not recommended.

HOW TO OPERATE FOUNTAIN

Test the fountain with 2 gallons of warm water before pouring in your beverage.

1. Pour at least two gallons of beverage in lower reservoir.
2. Plug the power cord in and turn switch "ON".
3. If beverage does not circulate within one minute, turn switch "OFF" for 10 seconds. Repeat this procedure several times until the beverage flows freely.
4. If this procedure fails, pour some of the beverage into top reservoir with switch "ON" until pump is activated. Refill the fountain or turn the fountain off when the lower reservoir is less than a quarter full. **DO NOT RUN THE FOUNTAIN DRY.**

BEFORE RETURNING

- Empty fountain and fill lower reservoir with 2 gallons of warm water and let circulate for five minutes. Empty unit and repeat again. It is NOT necessary to dismantle the fountain.
- DO NOT USE SCOURING PADS or any type of abrasive to clean fountain.
- DO NOT IMMERSE FOUNTAIN BASE IN WATER.

FOUNTAIN HINTS

- Pre-cool beverage whenever possible to at least 36°F (2°C) before adding to fountain.
- To chill a beverage, use chunks of ice in a bowl or ice cubes in a plastic bag (to prevent diluting the beverage).

- When using a carbonated beverage pre-chill to at least 36°F(2°C) before adding to fountain. Carbonation will dissipate after 10-20 minutes of circulating in the fountain. It is advisable to add smaller quantities of mixtures to the fountain from time to time to maintain carbonation.

PEACHBERRY PUNCH

We recommend a 5-gallon Igloo drink container to combine:

2 - 425gram Pkgs of Lipton Peach Juice Crystals

2 - 425gram Pkgs of Lipton Raspberry Juice Crystals

Add water to the top of your 5-gallon container & mix thoroughly until punch crystals dissolve. Ice is a necessity as this recipe is concentrated. Add ice to fill your punch fountain or bowl $\frac{3}{4}$ of the way full then add punch mixture to fill the rest.

Initially, this mixture is sweet and concentrated. Allow some time for the ice to melt and dilute the mixture before serving.

For a more decorative effect, add fresh or frozen cranberries and/or thin slices of orange.

Should any problems arise or if you have any questions, contact us at (403) 347 - 7733.

Thank you for your cooperation.
Have a great event!!!
